PROFESSIONAL SUMMARY

Computer Science undergraduate with strong foundations in data structures, algorithms, and object-oriented programming, with hands-on experience in Artificial Intelligence (Game AI) and Reinforcement Learning. Experienced in building real-time systems, autonomous agents, and multiplayer architectures using Unity. Passionate about applying machine learning and intelligent systems to solve real-world and simulation-based problems.

TECHNICAL SKILLS

Programming Languages: Python (ML), C++, C#

AI/ML: Basic Understanding of Machine Learning Algorithms, Reinforcement Learning (RL), Unity ML-Agents Toolkit, Familiarity with PyTorch

Game AI & Systems: State Machines, Autonomous Agents (NPC Behavior), Decision-Based Systems

Software Development: Object-Oriented Programming, Data Structures & Algorithms, Software Engineering Principles, Debugging & Unit Testing

Tools: Unity Engine, Unreal Engine, Blender 3D, GitHub, Unity DevOps

Soft Skills: Problem-Solving Skills, Good Communication, Teamwork Abilities

PROFESSIONAL EXPERIENCE

Unity Developer Intern — Vyorius May 2025 – Present

- Developed modular systems for real-time interactive applications
- Built autonomous enemy AI systems using state machines and decision logic
- Implemented behaviors such as patrolling, detection, and combat interaction

Game Developer Intern — TuteDude Jul 2024 – Aug 2024

- Developed gameplay systems and software modules using C# and object-oriented programming principles.
- Built a multiplayer system using Photon Fusion, implementing synchronization, networking logic, and debugging tools.
- Debugged gameplay features and optimized code performance through testing and refactoring.

Freelance

- Delivered a complete application within 20 days using rapid prototyping
- Adapted to dynamic client requirements while maintaining code stability
- Demonstrated strong problem-solving and time management skills

PERSONAL PROJECTS

SurvivalX – Decision Simulation Platform (Team Project)

- Developed a full-stack web application using **Spring Boot (backend)** and **React (frontend)**
- Built a platform **enabling users to share real-life** life-threatening incidents and crime experiences
- Designed a system to provide insights, survival strategies, and decision-based learning from real scenarios
- Integrated **Unity WebGL simulations** to create immersive, realistic scenario-based experiences
- Implemented decision-driven logic allowing users to explore different outcomes and consequences
- Deployed backend on **AWS Elastic Beanstalk** and frontend on **AWS Amplify**
- Ensured scalable, responsive, and cloud-hosted architecture for seamless user access

Autonomous Agent Navigation using Reinforcement Learning (Unity ML-Agents)

- Trained an agent to navigate and reach a target using reward-based learning
- Implemented training using Python ML-Agents pipeline
- Improved performance through reward tuning and iterative training

Multiplayer Platformer (Real-Time System)

- Developed a multiplayer system using Photon Fusion
- Implemented synchronization, networking logic, and debugging tools

EDUCATION

B.Tech in Computer Science

Ujjain Engineering College 2022 – 2026

Senior Secondary (12th)

IBS Global Academy, Ujjain 2020 – 2022

Leadership Experience

Chief Training and Placement

Student Coordinator

Developed strong communication and leadership skills.

CERTIFICATIONS

- IELTS Score: Band 7
- Google Solution Challenge 2024
- Google Cloud & Generative AI Courses
