PROFESSIONAL SUMMARY

Computer Science undergraduate and software developer with experience in C#, C++, and modern web technologies including HTML, CSS, and JavaScript. Experienced in building scalable applications, multiplayer systems, and interactive software using structured programming and object-oriented principles. Strong problem-solving ability with hands-on experience in debugging, testing, and collaborating in team environments. Passionate about learning new technologies and contributing to high-quality software solutions.

SKILLS

Programming Languages: C#, C/C++

Web Technologies: HTML, CSS

Software Development: Object-Oriented Programming, Data Structures & Algorithms, Software Engineering Principles, Debugging & Unit Testing

Tools: Unity Engine, Unreal Engine, Blender 3D

Version Control: GitHub, Unity DevOps

Other Skills: Problem Solving, Technical Documentation, Agile Collaboration

PROFESSIONAL EXPERIENCE

Unity Developer Intern — Vyorius

May 2025 – Present

- Developed and maintained software modules for interactive real-time applications.
- Refactored code to improve modularity and maintainability following software engineering best practices.
- Collaborated with designers and developers to implement features and fix defects.
- Used version control systems to manage development workflow and maintain project stability.

Game Developer Intern — TuteDude

Jul 2024 – Aug 2024

- Developed gameplay systems and software modules using C# and object-oriented programming principles.
- Built a multiplayer system using Photon Fusion, implementing synchronization, networking logic, and debugging tools.
- Designed and implemented UI logic and workflows, improving usability and software interaction.
- Debugged gameplay features and optimized code performance through testing and refactoring.
- Collaborated with developers to implement features and maintain clean, documented code.

Game Developer Intern — Academor

Apr 2023 – May 2023

- Gained foundational knowledge in **Augmented Reality (AR) and Virtual Reality (VR)** technologies.
- Implemented AR/VR features in games using **Vuforia**, enhancing user engagement and interactivity.

Freelance

- Delivered a fully functional application within 20 days by following rapid prototyping and iterative development practices.
- Adapted to daily changing client requirements, implementing new features and improvements while maintaining code stability.
- Demonstrated strong problem-solving, time management, and fast learning ability while developing under tight deadlines.

PERSONAL PROJECTS

SurvivalX: A website that combines both blogs and simulation to spread awareness and increase survival rates through training simulation which will improve decision making.

Multiplayer Platformer: A 2D platformer that connects multiple users via video, voice and chat when user enters the bubble of another user.

City Of cars: A free roam world where you will be able to drive a car which can also fly, and complete missions. Take snapshots of the beautiful city and you can even call for back up heli.

FlyWithTheWind: A game where player controls a paper plane and tries to stay airborne for as long as possible. Real usecase is with wrist device which can be used for rehabilitation.

EDUCATION

B.Tech in Computer Science

Ujjain Engineering College 2022 – 2026

Senior Secondary (12th)

IBS Global Academy, Ujjain 2020 – 2022

Leadership Experience

Chief Training and Placement

Student Coordinator

Developed strong communication and leadership skills.

CERTIFICATIONS

- IELTS Score: Band 7
- Google Solution Challenge 2024
- Google Cloud & Generative AI Courses
