PROFESSIONAL SUMMARY

Detail-oriented and analytical Computer Science student with experience in software testing, bug reporting, gameplay validation, and quality assurance practices. Skilled in identifying defects, documenting issues, regression testing, and collaborating with development teams to improve product quality. Hands-on experience in Unity development, multiplayer systems, and software debugging with strong communication and problem-solving abilities. Passionate about delivering reliable and user-friendly software experiences.

SKILLS

Quality Assurance & Testing	Technical Skills	Soft Skills
- Manual Testing - Bug Reporting & Documentation - Regression Testing - Test Case Execution - Functional Testing - Unit Testing	- Unity Engine - C#, C/C++ - GitHub - Object-Oriented Programming - SDLC & Software Engineering Principles	- Analytical Thinking - Attention to Detail - Communication & Team Collaboration - Problem Solving - Fast Learning & Adaptability

PROFESSIONAL EXPERIENCE

Unity Developer — Vyorius (May 2025 – April 2026)

- Tested gameplay mechanics and level interactions to ensure smooth user experience.
- Identified performance bottlenecks and contributed to optimization improvements.
- Collaborated with team members to validate new features and maintain project stability.
- Used version control tools to manage development workflow and testing updates.

Intern — TuteDude (Jul 2024 – Aug 2024)

- Tested multiplayer gameplay systems and validated synchronization logic across network sessions.
- Identified and fixed UI/UX inconsistencies and gameplay bugs during development.
- Assisted in debugging collision systems and optimizing gameplay interactions.
- Collaborated with developers to ensure smooth functionality and reliable feature delivery.
- Worked with iterative testing and rapid feedback cycles during development.

QA Tester (Freelance) — Megha Cat Studios

- Performed manual testing on gameplay systems and application features to identify bugs, glitches, and usability issues.
- Documented defects with detailed reproduction steps, screenshots, and severity reports for developers.
- Conducted regression testing after fixes to ensure stability and prevent recurring issues.
- Provided gameplay and UX improvement suggestions to enhance overall user experience.
- Collaborated with the development team to validate feature functionality and software reliability.
- Maintained organized testing documentation and feedback reports.

PROJECTS

- SurviveX:** Tested requirements, made sure all the functional requirements are working, gave reports on bugs and new features to be added. [survivex.in](#)
- Food Delivery Web App Testing Project:** Performed manual testing on a food delivery web application to identify functional and UI-related issues.
- City Of cars:** Developed and tested mission systems, vehicle mechanics, and gameplay interactions.
- Performed debugging and gameplay validation to improve user experience and system stability. [Video](#)
- Parkour Game:** Tested movement mechanics, collision systems, and level progression functionality.
- Identified and fixed gameplay bugs affecting player experience. [Video](#)

EDUCATION	Leadership Experience	CERTIFICATIONS
B.Tech in Computer Science Ujjain Engineering College 2022 – 2026	Chief Training and Placement Student Coordinator	- IELTS Score: Band 7 - Google Solution Challenge 2024 - Google Cloud & Generative AI Courses
Senior Secondary (12th) IBS Global Academy, Ujjain 2020 – 2022	Developed strong communication and leadership skills.
