PROFESSIONAL SUMMARY

Game Developer with strong experience in Unity, multiplayer systems, and gameplay design, now expanding into project coordination, live operations, and production workflows.

Experienced in cross-functional collaboration, requirement analysis, and rapid iteration, with a strong understanding of game services, player experience, and live feature support.

Passionate about video games and eager to contribute to live products, engagement systems, and scalable game services.

SKILLS

Project & Collaboration

- Agile methodologies (Scrum basics), task tracking, iteration cycles
- Cross-team communication & coordination
- Requirement analysis & feature planning

Game Development & Technical

- Unity (Advanced), Unreal Engine (Beginner)
- Multiplayer systems
- Real-time systems & gameplay mechanics, AR/VR
- Debugging, issue tracking, performance optimization

Tools & Technologies

- GitHub, Unity DevOps
- Firebase, AWS cloud
- Agora SDK (real-time communication)

Programming

- C#, C/C++
- OOP, DSA

PROFESSIONAL EXPERIENCE

Unity Developer — Vyorius (May 2025 – April 2026)

- Collaborated with cross-functional teams to design and implement **interactive simulation experiences**
- Assisted in **feature planning, iteration cycles, and improving user experience flows**
- Contributed to version-controlled production workflows using **Unity DevOps**
- Supported testing, debugging, and continuous improvement of live simulation features

Game Developer Intern — TuteDude (Jul 2024 – Aug 2024)

- Developed a **multiplayer 2D game using Photon Fusion**, handling synchronization and room logic
- Designed and implemented **UI/UX flows**, improving usability and player interaction
- Integrated **real-time communication (Agora)** to enhance player engagement
- Identified and resolved gameplay issues through testing and debugging cycles
- Collaborated with team members to **iterate features based on feedback**

Game Tester (Freelance / Collaboration)

- Tested unannounced games and repoted back with full documents of the findings
- Structured testing approach and proper feedback

Freelance Developer

- Delivered a complete application within 20 days using rapid iteration cycles
- Managed changing requirements and ensured stable feature delivery under deadlines
- Demonstrated strong problem-solving and adaptability

PROJECTS

- City Of cars:** A free roam world where you will be able to drive a car which can also fly, and complete missions. Take snapshots of the beautiful city and you can even call for back up heli. [Gameplay Video](#)
- Parkour Game:** A fast-paced first-person game where players must avoid lava and reach an end cube. [Gameplay Video](#)
- FlyWithTheWind:** A game where player controls a paper plane and tries to stay airborne for as long as possible. [Gameplay Video](#)
- 2D Multiplayer Game:** Built real-time multiplayer systems with network synchronization & room management. Tested gameplay scenarios and resolved latency and sync issues

EDUCATION

B.Tech in Computer Science

Ujjain Engineering College 2022 – 2026

Senior Secondary (12th)

IBS Global Academy, Ujjain 2020 – 2022

Leadership Experience

Chief Training and Placement

Student Coordinator

Developed strong communication and leadership skills.

CERTIFICATIONS

- IELTS Score: Band 7
- Google Solution Challenge 2024
- Google Cloud & Generative AI Courses
